

Fixed Plant Shutdown

Client: Fortescue Metals Group
Location: Cloudbreak
Details: Fixed Plant Shutdown, September 2019
Man Hours: 13,500

Warrikal have successfully completed another major shutdown for our key client FMG. This shutdown involved 140 personnel for an 8 day duration across 86 different work fronts.

The Warrikal team were responsible for works across primary sizing infeed, conveying, screening through to the crushing facility.

During this shutdown Warrikal utilised our internal workforce that consisted of the following roles;

- Site Leadership
- HSE Advisors
- Boilermakers
- Coded Welders
- Mechanical Fitters
- Advanced Riggers
- Telehandler & EWP Operators
- Trade Assistants
- Site Administration

The team completed all works on time without any incidents during the entire 13,500 man hours worked onsite.

A huge achievement to all involved, with a special mention to the Warrikal leadership team whose commitment and dedication ensured that these works were completed on time and safely.

Warrikal are continuing to go from strength to strength and raising the bar with each project executed onsite.
